

# Aquatic pathogen PCR

Lyophilised qPCR and RT-qPCR detection kits for shrimp and fish pathogens, with extraction kits for tissue and pond sediment.

Availability and registration requirements differ by country. In the United States, veterinary tests for infectious disease are regulated as veterinary biologics by USDA APHIS and require a licensed importer; non-infectious veterinary tests fall under FDA CVM. Certificates are issued by the manufacturing site and supplied with the quotation. Registration and import licensing remain with the importer of record.
